

Réal Fortin

Operations Manager /
Sorting Centre

A graduate in Electronics and Industrial Mechanics, Réal Fortin has been active in the environment medium since 1981. He worked for seven years at "Récupération Bois-Francs" prior to continuing his career with the Gaudreau family. Since 1989, he has created many mechanical retrieval prototypes. He also designed the Gaudreau Sorting Centre, which he has been managing since 1996, as well as playing an active part in the development of some of the regional sorting centres.

Wiser for this technical experience and the research carried out during trips to Europe and the United States, Réal Fortin is known for his sense of innovation and great knowledge of the retrieval industry.

He is also involved with many organizations devoted to the protection of the environment;

- Member of the "Awareness Programme" committee for the "*Réseau-Environnement*";
- Member of the Preliminary Discussion Committee on Selective Collecting for "*Recyc-Québec*";
- Member of the "*Recyc-Québec*" design committee for the "*Guide d'aide aux municipalités pour la collecte sélective*" (Guide-book for Assisting Municipalities with Selective Collecting).
- Sorting Centre Committee Director for "*Réseau Environnement*".
- Taken from his beginnings at *Gaudreau Environnement*, Réal Fortin's contribution is invaluable.

Without a doubt, his qualifications and know-how will be a major asset to the company in the years to come.
